

# Going solar?

## PV application checklist

If applying to have your PV system connected to the Power and Water network, the following documentation must be included in your application:

- Completed and signed copy of the PV Inverter **Network Connection Agreement** (Power Networks – Photovoltaic Inverter Network Connection Agreement);
- Completed and signed copy of the **Power Purchase Agreement** for PV Inverter System;
- Payment of PV fee;
- A high quality combined power, protection and control schematic for the proposed electrical system. These diagrams may include connection arrangements and ratings for the following (go to **Requirements for Grid Connection of Photovoltaic Systems via Inverters** to see an example of the schematics view):
  - switches;
  - inverter;
  - PV-array;
  - metering;
  - earthing equipment;
  - distribution circuits;
  - protection, synchronisation and tripping; or
  - equipment interlocks.
- Your installer must submit a Certificate of Compliance and Schedule 3 of the PV Inverter **Network Connection Agreement** to the Connections Officer, Power Networks, Power and Water Corporation.

Completed applications can be lodged at any Power and Water Customer Service Centre. Alternatively the application can be posted, with a cheque for the PV fee made payable to Power and Water Corporation. Visit [powerwater.com.au/contact\\_us](http://powerwater.com.au/contact_us) for a list of regional Customer Service Centres and postal addresses.
