

10 buckets

PowerWater www.powerwater.com.au | call 1800 245 092

Try saving 10 buckets of water a day, it's easy.

On average, each Top Ender uses 55 buckets of water a day – more than twice as much as most Australians.

Saving 10 buckets of water a day can make a difference by saving money and helping look after this precious resource.

- Save 1 bucket a day by fitting a trigger nozzle to your hose for garden watering and car washing.
- Save 2 buckets a day by replacing a single flush (12L) toilet with a 4 star rated 4.5/3L dual flush.
- Save 6 buckets a day by reducing your shower time from seven minutes to three minutes.
